

DONA BANERJEE
Product Engineering / Technical Product Management /
Technical Program Management

Profile Summary

- MBA Professional from University of South Wales, UK, offering **16 years** of rich experience in managing **E-Commerce Platform and Manufacturing Engineering Solutions**
- **Certified Lean Six Sigma Black Belt** and ISO 9001:2008 Auditor
- **Experienced in managing a team** of 11 members and contributed towards their promotion and professional skill set
- Accredited as a **Bar Raiser** in Amazon
- Demonstrated **customer obsession** and **earned trust** through focused market research, benchmarking study and using the resultant analysis to devise the future product roadmap
- **Product strategy** and **portfolio leadership** across 0-to-1, and scale initiatives
- Led **enterprise governance, metrics, and operating model** design
- Established platform **transformation** and vendor-to-inhouse **transitions**
- Expertise in customer-centric **product innovation** grounded in data and insights
- Proficient in managing **end-to-end product design and development** including requirement analysis, finalizing specifications, testing, failure mode design analysis, vendor management and quality management
- Expertise in **conducting opportunity analysis** by keeping abreast of market trends and handling new product positioning, promotions and launches to counter-competition

Work Experience

Lead Technical Product Owner

Oct'24 – Present

A. P. Moller Maersk, Bengaluru, India

Key Deliverables and Accomplishments:

- Founded and scaled the **Network Architecture & Engineering product portfolio**, establishing the first product house for LAN, WAN, and virtual connectivity with in-house observability, monitoring, inventory, and landing-zone platforms, thereby **improving device provisioning, operational visibility and control by 40%**
- Defined and institutionalized the **Product Operating Model for Technology Service Engineering**, enabling consistent delivery of **15+ products as per GO LIVE timelines** and maturity across the full product lifecycle with zero **critical risks and 95% quality**
- Set enterprise-wide financial and engineering governance, introducing a **Total Cost of Ownership (TCO) model** and engineering excellence framework - resulting in standardized metrics, scorecards, and enabled **decision for Accelerate, BAU or Sunset category** for 42 critical focus products
- Led **automation of product metrics** by authoring an ADR and enabled automated sourcing of signals into the control plane for scalable decisions, thereby enhancing **real-time decision-making during LT reviews** and **reducing manual reporting overhead by 60%**
- Led a **multi-year platform transformation** toward in-house capabilities, replacing vendor-dependent tools (e.g., SolarWinds), delivering **~\$10M in annual savings**, aligning cross-functional stakeholders, and shaping a **3-year strategic roadmap** supported by PRFAQs and incident management frameworks

Core Competencies

- Product Lifecycle Management
- Technical Program Management
- UX Development
- Design Engineering
- Research and Development
- Technology Incubation
- Quality Assurance and Control
- Resource Optimization
- Process Engineering
- Manufacturing Excellence
- PROCES/OPEX
- Cross-Functional Coordination
- Stakeholder Engagement
- Value Engineering
- Team Management & Leadership
- World Class Manufacturing Tools

Soft Skills

- Communicator
- Strategic Innovator
- Thinker
- Collaborator
- Intuitive
- People Manager

Certifications

- Black Belt – KPMG
- ISO 9001:2008 -TUV
- Bar Raiser in Amazon
- Document Ninja from Amazon

Principal Product Manager
Stellantis, Bengaluru, India

Jan'24 – Aug'24

Key Deliverables and Accomplishments:

- Designed and operationalized a structured customer discovery framework across SA, EMEA, and APAC for **Affordable Portfolio** segment - defining 3 thematic groups, personas, and Voice of Customer (VoC) inputs, enabling data-driven feature prioritization through design thinking workshops
- Identified and scoped **MVP features for the first vehicle SOP release** in Q4 2024, ensuring timely and focused delivery for the Affordable portfolio and accelerating go-to-market readiness
- Developed a **cross-platform synergy strategy** between Smart Cockpit and Affordable segment, enabling cohesive technology integration and optimized user experience for the Q4 2024 vehicle tech SOP release

Senior Product Manager

Oct'23 – Jan'24

Fictiv Technology Solutions, Bengaluru, India

Key Deliverables and Accomplishments:

- Researched and formulated **18 key technical** customer interface features and vendor routing logic for the digital manufacturing solution application "Workbench", thereby strengthening **usability** and enabling **vendor orchestration**
- Designed and implemented the GTM strategy for Workbench application through staggered phases for **faster market penetration**

Product Manager Technical

Sep'16 – Jun'23

Amazon, Seattle, United States

Key Deliverables and Accomplishments:

- Led **end-to-end product strategy** and execution for multiple 0-to-1, and scale initiatives across asset management, fulfillment tech, transportation, and seller platforms, delivering measurable improvements in traceability, productivity, IMR, and OE
- Launched 8+ customer-facing and platform products (mobile/web) for Amazon's global marketplace, improving purchase decision quality, reducing customer contacts, and enhancing search experience through a **search curation velocity program**
- Drove fulfillment and hardware innovation including **RFID-powered smart asset management**, handheld/ring scanners and printers, inbound directed stow, and **Stow UI 2.0** - enabling automation in non-robotic FCs and improving operational quality
- Owned complex platform migrations and benchmarking programs, including transportation **account reconciliation migration** (Horizon to Cradle) and retail category benchmarking frameworks in partnership with engineering and data teams
- Scaled high-performing teams and delivery rigor, **managing a team** of 10 (4 promotions), leading sprint planning and tech debt reduction, defining program roadmaps and GTM, and partnering cross-functionally to drive UAT, web labs, and staged global launches

Education

- **MBA** (Major in Strategic Supply Chain Management), from University of South Wales, UK with Distinction in Jul'11
Achievement: Recipient of Best Dissertation Award in MBA under Human Resource Management category by ACAS, Wales
- **B.E.** (Electrical and Electronics Engineering), from M.S. Ramaiah Institute of Technology, Bengaluru, India with Distinction in Jul'06

Career Timeline

Oct'24 – Present
